

International Education Week

During the fall 2014 EducationUSA Advising Center and American Councils for International Education celebrated the worldwide event - the annual Education Fair and International Education Week. As IEW boasted with its 15th anniversary that year we organized a lot of special educational presentations, discussion panels, games and events all targeting one goal - to introduce the higher education in the United States of America.

Separately, all presentations and talks that were introduced during IEW can be easily downloaded in the PDF format below:

IEW 2014 Presentations in PDF Format
